Response to Arguments

Applicant's arguments filed on 4/21/04 have been fully considered but they are not persuasive. In re. p.11-12 applicant argues with respect to claim 1, that Kojima does not teach or suggest any arrangement that corresponds to the AV file management means. In response, the examiner respectfully disagrees, Kojima teaches in (col.1 ll.1217) the endless recording of AV data which shows the arrangement between AV file management means and recording means.

In re. p.12 applicant argues with respect to claim 5, that Kojima does not disclose structure for managing the AV data recording area that is repeatedly overwritten. In response, the examiner respectfully disagrees, Kojima teaches in (col.1 ll.1217) the endless recording of AV data.

In re. p.13 applicant argues that Kojima does not disclose the setting of a maximum size. In response, the examiner respectfully disagrees, since Kojima does teach the setting of a size, the size can be set to whatever the user believes the maximum should be.

In re. p.14 applicant argues that Kojima does not disclose whether or not there is an unrecorded area. In response, the examiner respectfully disagrees, since in s.3 of fig.6 Kojima poses the question whether or not there should be endless recording, and if there is not endless recording there must be an area that is unrecorded.
